

MAISHA MAZURI is a volunteer project which aims to help Kidenge Primary School in Msangani village outside of Dar Es Salaam, Tanzania. “Maisha Mazuri” means “Good Life” in Swahili which reflects the main goal of the Project – to give village children a hope for a better life and provide them with good conditions to study.

At the moment Kidenge school is in poor conditions with no proper floors, tables, chairs, lacking text and exercise books, no drinking water or food available for children during school time, no sport items like balls etc. Even not every classroom has a blackboard and all teachers needed. On the photos below you can see the present situation at Kidenge school in Msangani village.

MAISHA MAZURI Project aims to repair the school and buy all the necessary studying materials, as well as provide important facilities like water tanks.

MAISHA MAZURI and the village children of Msangani village are very grateful for KMT Robotic Solutions AB support and involvement in improving school facilities and materials.
