

DYNAMIC ROBOTIC SOLUTIONS

After Market Service

RETROFIT WITH NEW ROBOT

Reduced maintenance
cost for the robot

Description:

Your Cutting Box is a high quality machine that will be reliable over many years. Some of these machines are really old but rather than taking them out of production, our customers will usually upgrade them with new robots and keep going with shorter cycle times and higher productivity.

Please contact us for more information. Our technical team does several of these retrofits every year.

Customer benefits:

- Reduction of the part cycle time.
- Spare parts availability.
- Reduced maintenance cost for the robot.
- Lower cost per part cut with the machine.
- Limited investment, fast and predictable pay-back.

NEW: Robots M2004 with IRC5

The new generation of ABB robots M2004 with their IRC5 control are faster and offer better performances than the older generation of robots with S2/S3 control used in the past.

For more details, refer to ABB brochures:

- IRB 2400 industrial robot
- IRC5 robot controller
